Ohio Labor Market Information

# Labor Market Review

## December 1985

**Summary.** Ohio's seasonally adjusted unemployment rate was 8.1 percent in December, down from 8.9 percent in November. The national rate slipped from 7.0 percent to 6.9 percent. In December 1984, the Ohio unemployment rate was 9.1 percent, while the U.S. rate was 7.2 percent. The unadjusted unemployment rate for Ohio in December 1985 was 8.5 percent, down from 9.0 percent in November. Total employment declined .3 percent to 4,730,000, but the number of unemployed individuals fell to 437,000. Seasonal gains in retail trade offset losses in construction to help raise nonagricultural wage and salary employment .2 percent to 4,461,700.

**Factory Employment.** Manufacturing employment in Ohio totaled 1,114,500 in December, up slightly from November. The increase occurred in durable goods production as primary metal industries, transportation equipment, and electric and electronic equipment all had significant gains. Fabricated metal products, stone, clay and glass products, and lumber and wood products had reduced employment in December.

**Factory Hours and Earnings.** Factory production workers in Ohio earned an average of $498.50 per week in December, up $11.75 from November. Their average workweek rose .8 hours, to 42.9 hours. Nearly all industries had higher average weekly earnings due to increased overtime. The most significant were motor vehicles and equipment, metal forgings and stampings, and metalworking machinery.

**Nonmanufacturing.** Ohio's nonmanufacturing employment, at 3,347,300, was up .3 percent from November. Most of the increase was due to seasonal gains in retail trade, especially in department stores. Services also had higher employment (thanks to variable declines in private colleges and universities). Poor weather caused large employment losses in construction.

**Over the Year.** There were 33,000 fewer unemployed Ohioans in December 1985 than in December 1984. During the period, the unadjusted unemployment rate fell from 9.0 percent to 8.5 percent. Total employment grew 2.1 percent, while nonfarm wage and salary employment gained 3.0 percent. Nonmanufacturing increased by 145,000 jobs. All major divisions in this sector had more workers, with services and retail trade increasing the most. Manufacturing employment dropped 16,100 from December 1984. Nearly all industries had reduced employment, especially nonelectrical machinery, electric and electronic equipment, primary metal industries, and fabricated metal products. Only transportation equipment, lumber and wood products, printing and publishing, and instruments and related products had employment gains over the year.

**Benefits and Costs.** There were 105,007 initial claims filed under the Ohio Unemployment Compensation Law in December, a 32.9 percent increase from November and a 2.9 percent increase from December 1984. The average weekly number of benefit recipients was 191,618, up 17,484 from last month, and up 3,298 from December 1984. Total benefits paid were $60.4 million, up 14.1 percent from November. The average unemployment check rose $.13, to $148.42. At the end of December there were 190,830 active employer accounts.

Ohio Bureau of Employment Services
Richard F. Celeste, Governor  Dr. Roberta Steinbacher, Administrator

Employment Service [illegible] 43,239 new job applicants in December down 7.8 percent from November and down 2.7 percent from December 1984. Over 9,000 were still receiving Trade Readjustment Allowances. The Employment Service Division made [illegible]

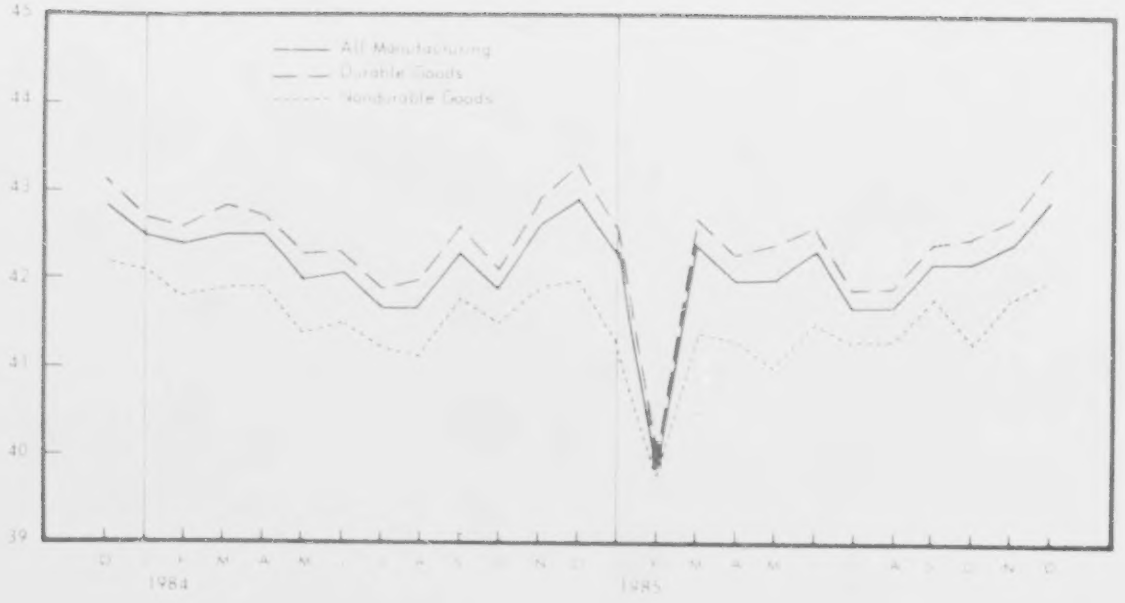
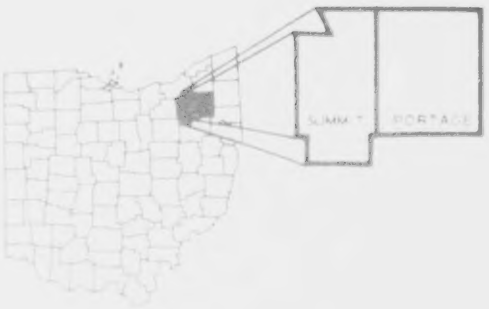
[a]See Technical Notes for concepts. [b]Preliminary. [c]Revised. [d]Based on unrounded figures. [e]Includes miscellaneous manufacturing. [f]Includes tobacco manufactures; textile mill products; petroleum and coal products; leather and leather products. [g]Money payments only; tips not included. [h]Includes State universities, State schools for deaf and bling, and the State library. Excludes hospitals, the agricultural extension service, agricultural research centers, and the Ohio Department of Education. [i]Depressed due to labor-management disputes.

AVERAGE WEEKLY HOURS OF PRODUCTION WORKERS IN OHIO MANUFACTURING INDUSTRIES



# AKRON

## PRIMARY METROPOLITAN STATISTICAL AREA



Nonagricultural wage and salary employment in Akron, at 263,200, was up 300 from November, as gains in nonmanufacturing were partially offset by declines in manufacturing. Seasonal factors boosted retail trade and created construction employment. Scattered losses in fabricated metal products and machinery and primary metals caused manufacturing employment to fall 300, to 64,900. Hourly earnings of factory workers rose 4 cents, to $11.22 at the mid-point. The average workweek, at 44.0 hours, was up 1 hour.

# CINCINNATI

## PRIMARY METROPOLITAN STATISTICAL AREA

Cincinnati's nonagricultural wage and salary employment in December, at 642,700, was up 1,900 from November. Retail trade and services had increased employment, while construction employment declined. Gains in durable-goods employment were cancelled out by losses in nondurable-goods employment, leaving manufacturing unchanged at 149,000. Manufacturing production workers averaged $10.78 per hour for a workweek of 42.4 hours, up 9¢ and .2 hours, respectively, from November.

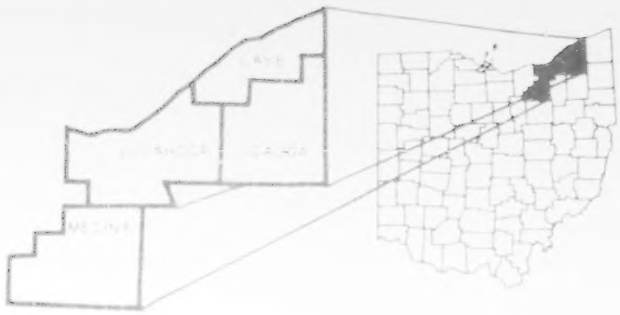
# CLEVELAND
## PRIMARY METROPOLITAN STATISTICAL AREA



Nonagricultural payroll employment in Cleveland rose 600 from November to 874,000 in December. Increases in retail trade employment were offset by losses in construction and local government. Scattered declines throughout durable-goods industries lowered manufacturing employment 300, to 207,900. Factory production workers increased their average hourly earnings to $11.37, up 11¢. Their workweek of 42.3 hours was 0.6 hours above the November value.

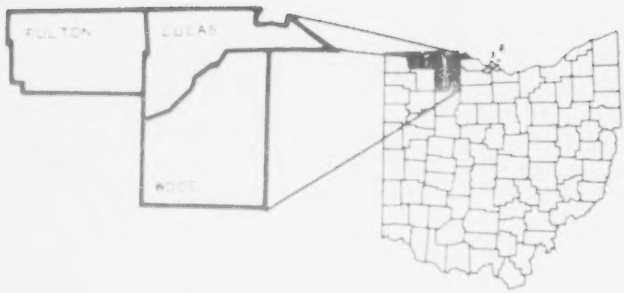
# TOLEDO
## METROPOLITAN STATISTICAL AREA



Nonagricultural establishments in Toledo employed 272,300 in December, an increase of 800 from November. All of the increase occurred in nonmanufacturing industries, as manufacturing was unchanged at 65,800. Gains were seen in retail trade and local schools, but construction employment was down. The average hourly earnings of manufacturing production workers rose 6¢ from November, to $12.54. The average workweek, at 43.4 hours, was up .5 hours.

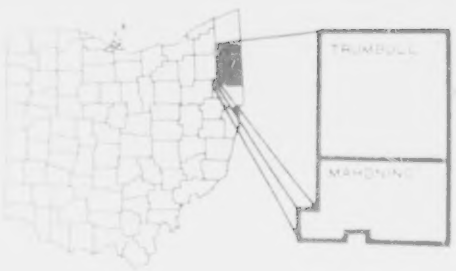
# YOUNGSTOWN - WARREN METROPOLITAN STATISTICAL AREA



Nonfarm payroll employment in the Youngstown-Warren area rose 300 from November, to 188,200 in December. Nonmanufacturing employment rose just 2.9% due chiefly to seasonal increases in retail trade and offsetting declines in construction. Gains in primary metal industries helped raise manufacturing employment 600 to 53,600. Factory production workers averaged $13.73 per hour in December, up 31¢ from November. Their average workweek dropped 2 hours to 44.3 hours.

## Civilian Labor Force Estimates

Civilian Labor Force.--Estimated number of workers 16 years of age and over, employed or unemployed during week including 12th of month, distributed by place of residence.

Total Employed.--Includes nonagricultural wage and salary workers, the self-employed, unpaid family workers, domestics, agricultural workers, and persons involved in labor disputes. Estimates of self-employed, domestics, and unpaid family workers based on data from U.S. Department of Labor and Bureau of the Census. Agricultural worker estimates derived from information supplied by U.S. Department of Agriculture. Employment distributed by place of residence.

Total Unemployed.--Estimated number of persons, by place of residence, who did not work during reference week and were looking for work, whether or not eligible for unemployment compensation. Includes those who did not work and were waiting to be called back to an old job or to report to a new job.

## Nonagricultural Wage and Salary Employment

Collection.--Nonagricultural wage and salary employment as well as hours and earnings estimates based on monthly reports from sample of employers. Under cooperative arrangement with U.S. Bureau of Labor Statistics, Labor Market Information Division of Ohio Bureau of Employment Services mails, edits, and processes Ohio reports, which are subsequently incorporated in national data.

Industrial Classification.--Employer establishments classified by industry on basis of their principal product or service. The Standard Industrial Classification Manual (U.S. Office of Management and Budget, Washington, D.C., 1972, amended 1977) used for classification.

Coverage.--Monthly reports on employment and (for most industries) payroll and hours obtained from approximately 10,500 Ohio employers.

Coverage of Ohio Nonagricultural Employment Sample

| Industry Division | Approximate Percentage Covered by Sample |
|---|---|
| Total | 34 |
| Manufacturing | 61 |
| Nonmanufacturing | 17 |
| Mining | 33 |
| Construction | 26 |
| Transportation and Public Utilities | 46 |
| Wholesale Trade | 22 |
| Retail Trade | 2% |
| Finance, Insurance, and Real Estate | 41 |
| Services and Miscellaneous | 2% |
| Government | 70 |

Nonagricultural Employment.--Persons who worked during, or received pay for, any part of pay periods which include 12th of month, distributed by place of employment. Includes persons on paid sick leave, paid holiday, or paid vacation. Excluded are persons laid off, on strike, or on unpaid vacation during entire reporting period. Proprietors, the self-employed, unpaid family workers, farm workers, and domestic workers also excluded. Government employment covers only civilian employees. Full-time teachers considered employed during the summer vacation period, whether or not paid in those months.

Estimating Method.--Total employment is estimated from the employment of establishments reporting for two consecutive months, as follows:

$$\text{Total Employment (current month)} = \text{Total Employment (previous month)} \times \frac{\text{Sample Employment (current month)}}{\text{Sample Employment (previous month)}}$$

Benchmark Data.--Employment estimates compared annually with complete count of employment, by industry. Where revisions necessary, monthly estimates adjusted to new benchmark. Following revisions to new benchmark, industry data projected forward to current month by use of sample trends. Basic source of benchmark information is tabulations of employment data, by industry and area, compiled from contribution reports of employers covered under Ohio Unemployment Compensation law. Data are based on March 1984 benchmark.

## Hours and Earnings

Method of Computing Averages.--Average hours computed by dividing total production worker hours worked during one week (the seven-day periods which include 12th of month) by number of production workers reported for such week. Average hourly earnings computed by dividing total production worker payroll for one week by total production worker hours for week. Average weekly earnings derived by multiplying average hourly earnings by average weekly hours.

Definitions.--Definitions of production or similar workers, payroll, and hours--from which average hours and earnings data are derived--follow:

Production Workers.--Includes working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storage, handling, packing, warehousing, shipping, maintenance, repair, janitorial and guard services, product development, auxiliary production for plant's own use (such as power plant), and record keeping and other services closely associated with production operations.

Nonsupervisory Workers.--Includes employees (not above working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, attendants, service employees, line installers, laborers, accountants, janitors, guards, and other employees whose services are closely associated with those of occupations listed.

Payroll.--Represents payroll for full- and part-time production, construction, or nonsupervisory workers who received pay for any part of pay periods which include 12th of month. Payroll is reported before deductions for social security, group insurance, withholding tax, bonds, and union dues; also includes pay for overtime, holidays, vacations, and sick leave paid directly by the firm. Bonuses (unless earned and paid regularly each pay period), tips, pay not earned in pay period reported (such as retroactive pay), and value of free rent, fuel, meals, or other payments in kind, excluded.

Hours.--Represents hours worked or paid for, during pay periods which include 12th of month, for production, construction, or nonsupervisory workers. Hours include time paid for holidays and vacations, and for sick leave when pay received directly from firm.
